

Customer Bulletin - Coronavirus (COVID-19)

In line with the World Health Organisation (WHO) recommendations, ML Doctors are taking the following precautions to mitigate the risk to our employees, suppliers and Customers:

- Ensuring good hygiene in the workplace in order to reduce risks of exposure – promoting regular and thorough handwashing and ‘Catch It, Kill It, Bin It’.
- Making sure our facilities are in good condition with hot water, soap and hand sanitiser readily available.
- Providing education on how to spot the symptoms (i.e. cough, difficulty breathing and fever) with an agreed procedure to follow if they have any concerns.
- Requesting that employees inform their line manager should they visit/ return from a ‘hot spot’ as per the guidance from: <https://www.gov.uk/guidance/coronavirus-covid-19-information-for-the-public>
- We have a developed contingency and business continuity plan in place which provides for many possible situations that may arise due to Coronavirus.

ML Doctors will continue to review our response in line with international and governmental advice.

Kind Regards

Mr M Zia

Managing Director
